Practical – VII

Roll No.: T044	Name: SACHIN SINGH
Class: TY.IT	Batch: 1
Date of Assignment: 02/09/2026	Date/Time of Submission:01/09/2026

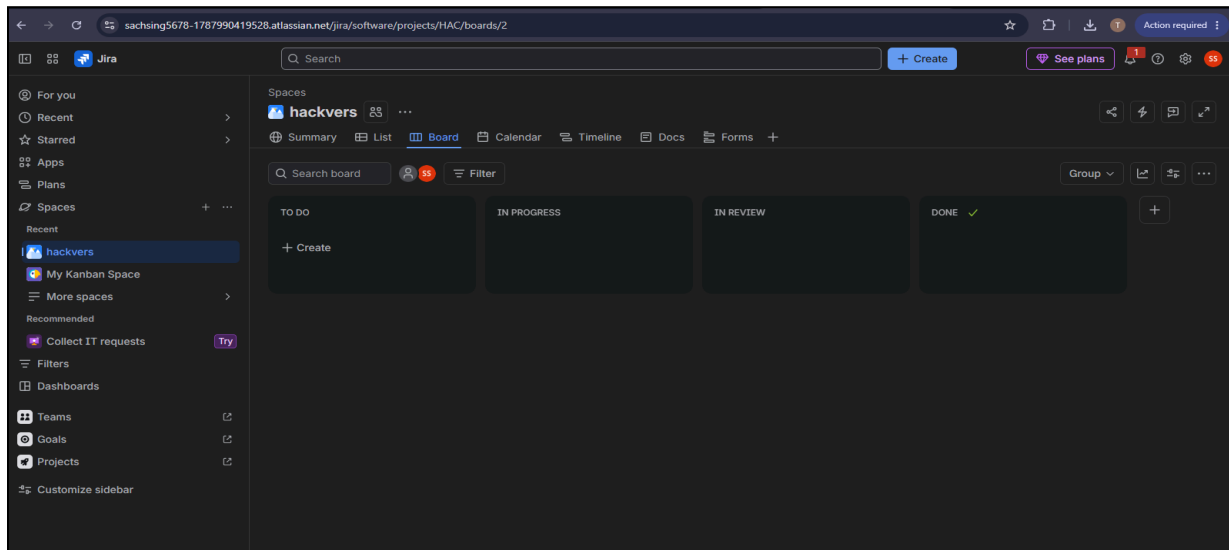

3A Create and configure Issue Types (Epic, Story, Task, Bug)

Open the FSP board of the Full Stack Project.

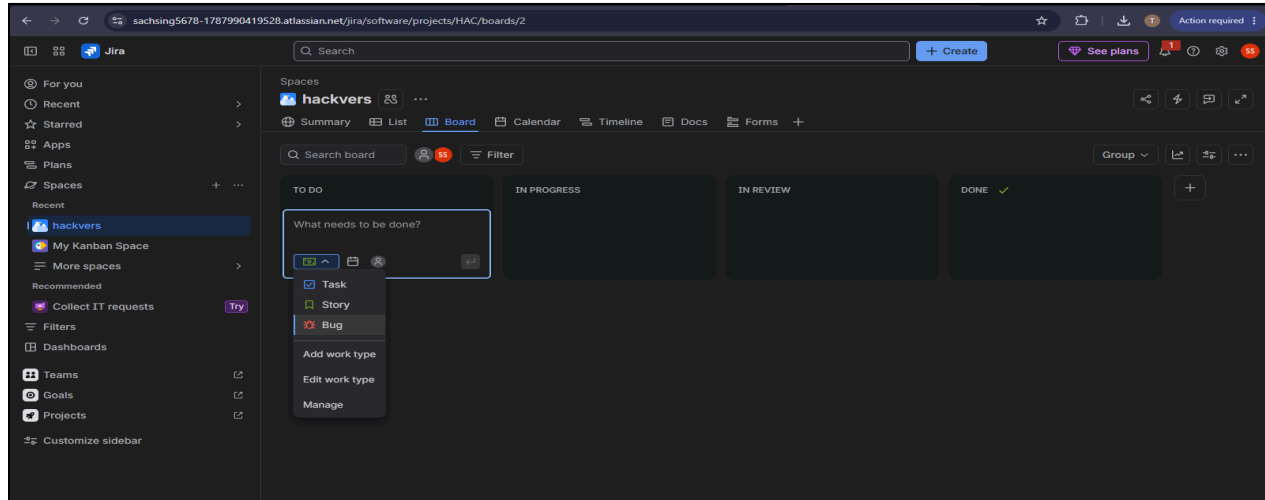

The Kanban board contains different columns representing different stages of work:

Backlog - Selected for Development - In Progress – Done

The Kanban board gives a visual representation of the work being performed in the project.

In the Backlog column, click Create. A new issue card will appear with the field:
What needs to be done?
Enter the name of the work item.
For example:Team Interaction

Click the issue-type icon/drop-down on the issue card.

The screenshot shows the available issue types:

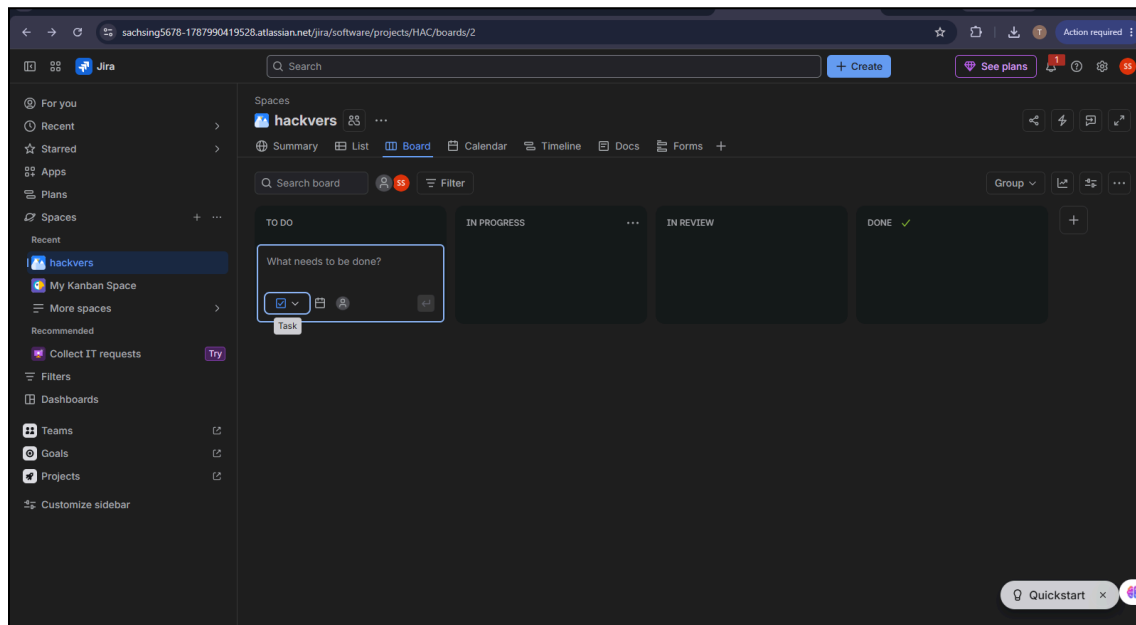

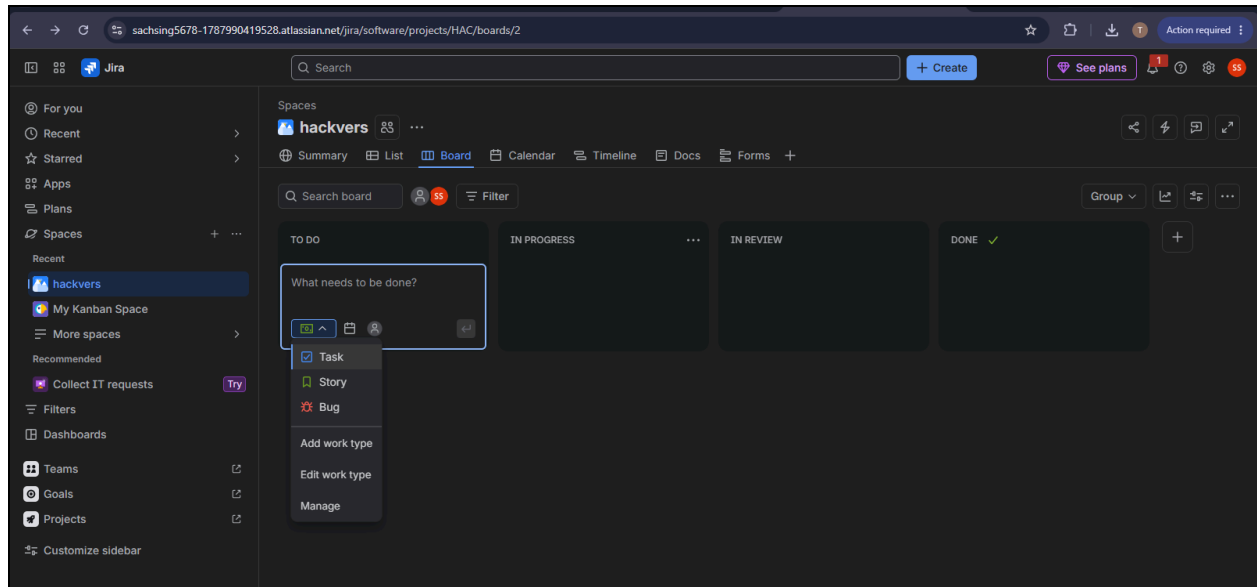

- Epic
- Task
- Bug

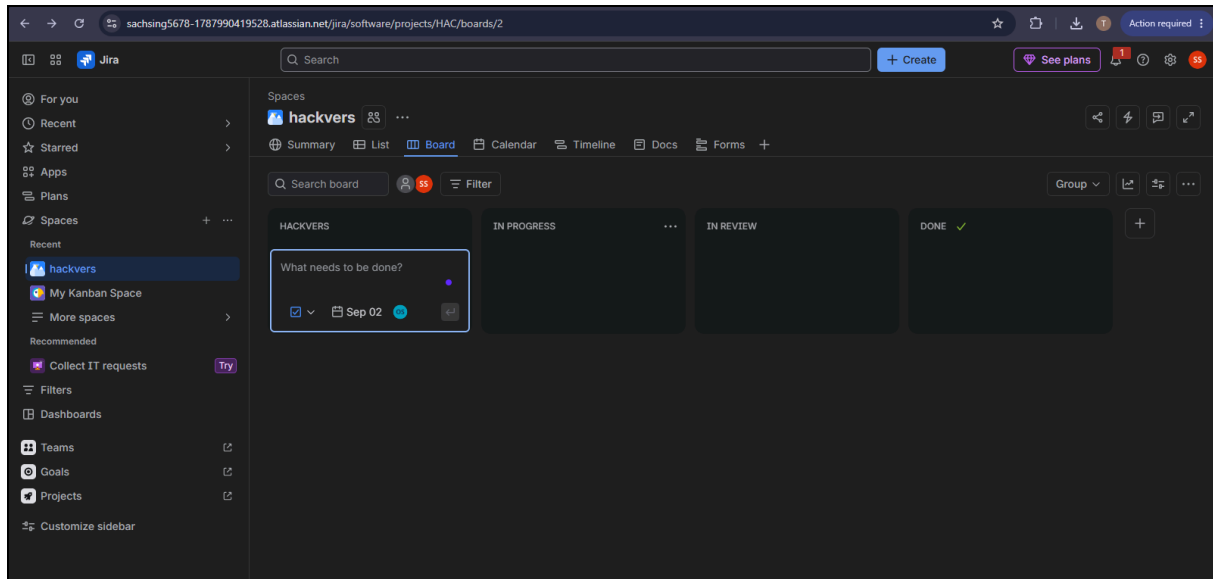

Select the appropriate issue type.

Different types of work are represented differently in Jira.

For example:

- Task - A specific piece of work
- Bug - A problem or defect
- Epic - A large body of work

For a normal activity, select Task as the issue type.

Enter a suitable task name.

Example:

Team Interaction

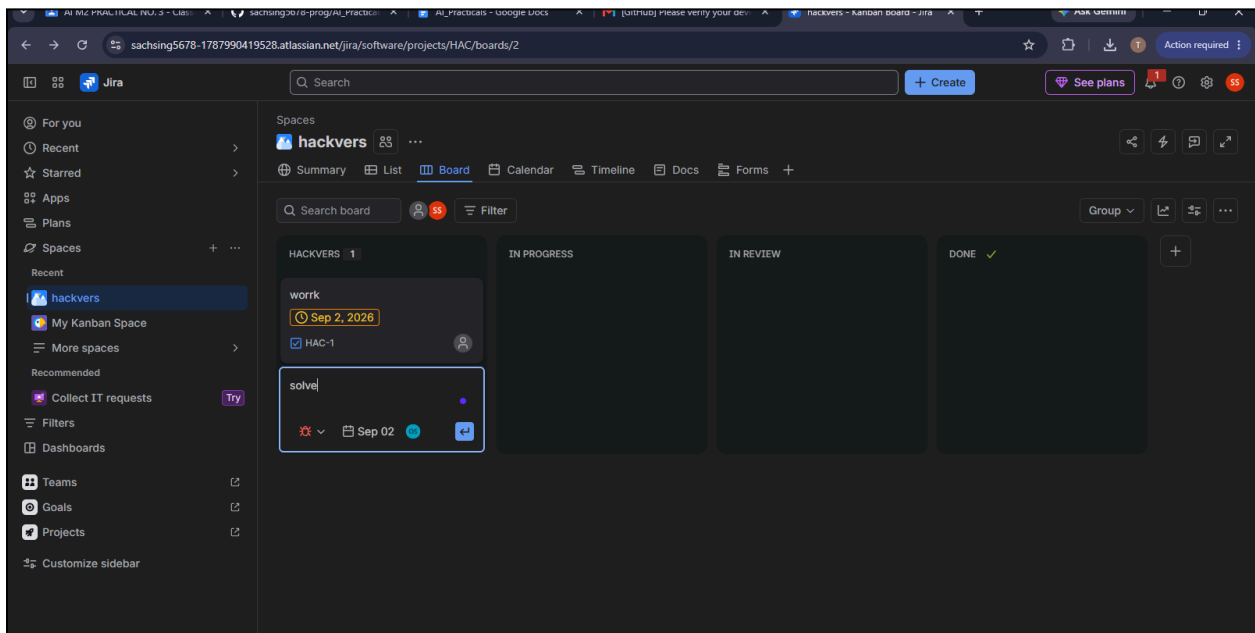

Click the Create/Enter button to create the issue.

The task will appear as a card in the Backlog column.

Create another issue and select Bug as the issue type.

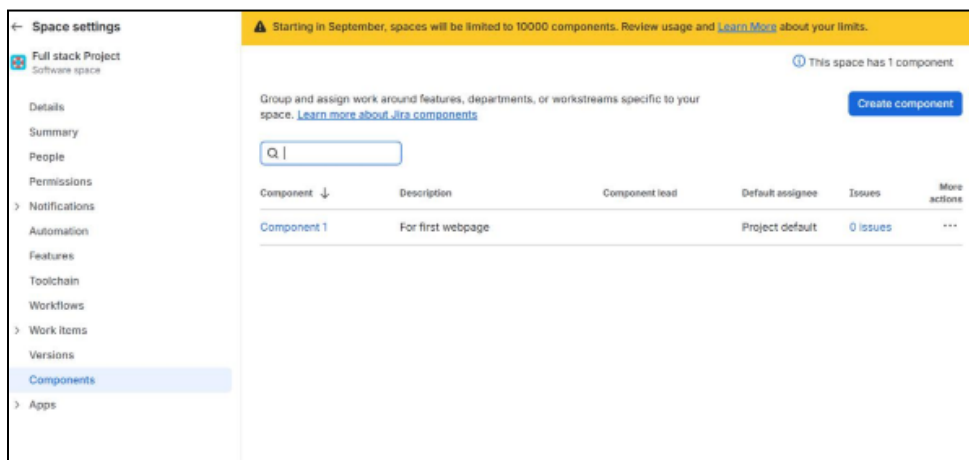

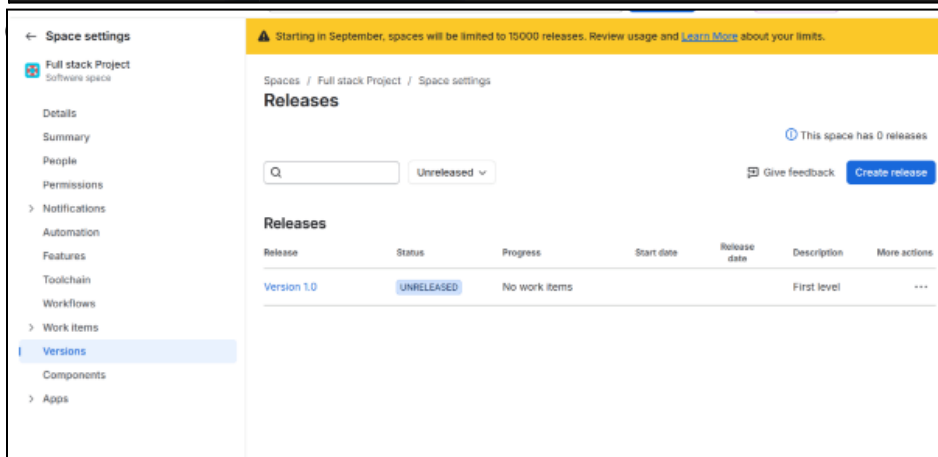

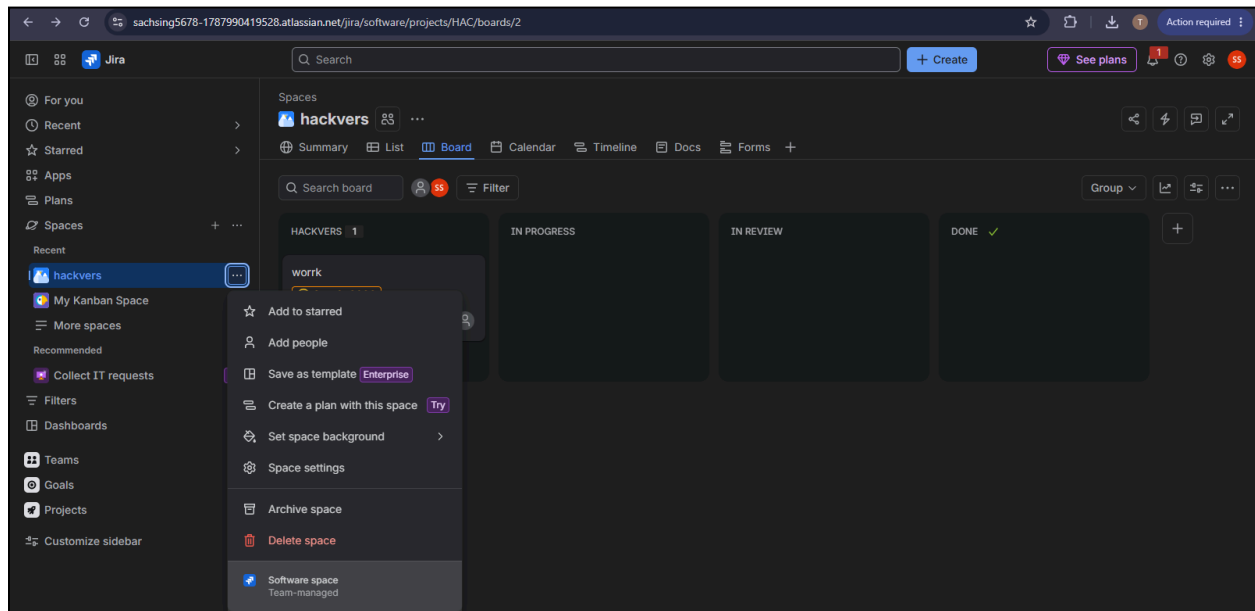

For example:

Fix Homepage: The bug will be represented with the Bug issue type/icon.

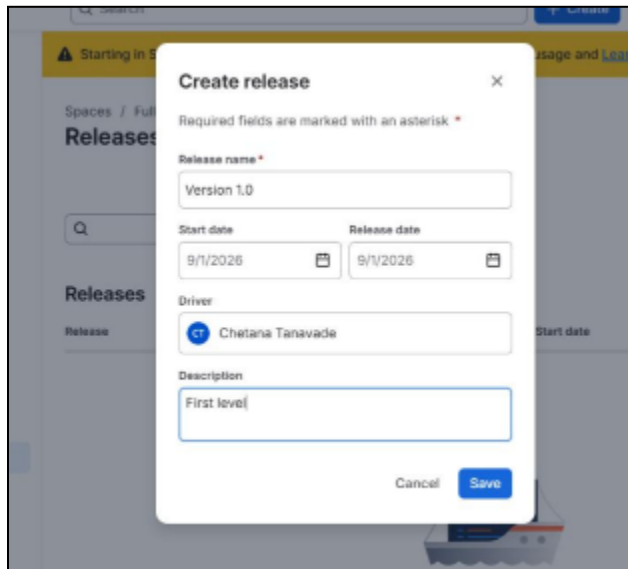

3B Create Components and Versions.

Click on space settings

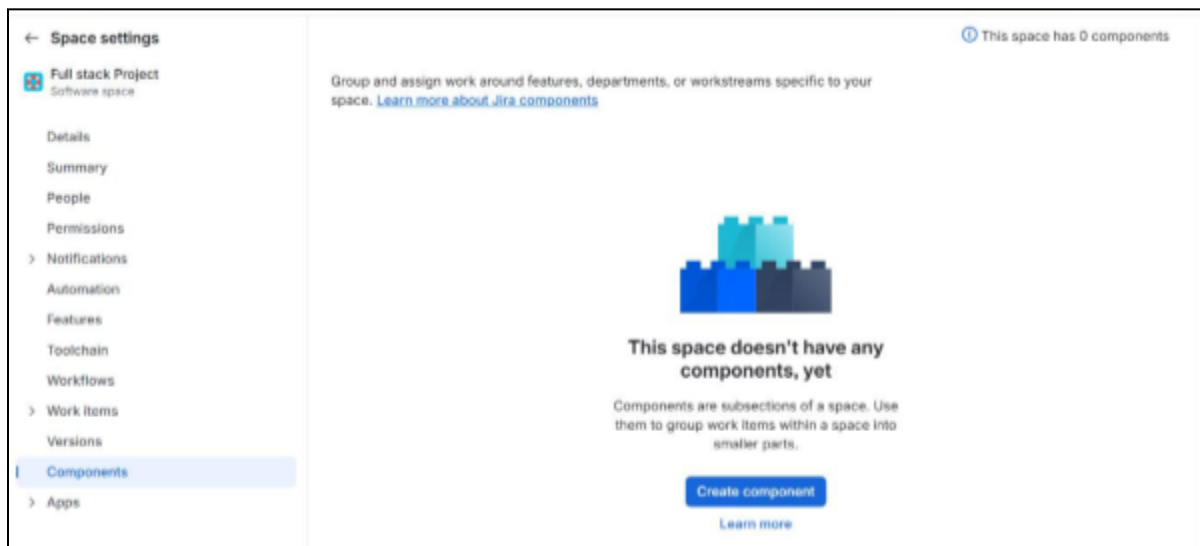

Enter details and click save.

The screenshot shows a 'Create release' modal window in Jira. The modal has a title bar with a close button. Below the title, it states 'Required fields are marked with an asterisk *'. The form contains the following fields: 'Release name *' with the value 'Version 1.0'; 'Start date' with the value '9/1/2026'; 'Release date' with the value '9/1/2026'; 'Driver' with a user icon and the name 'Chetana Tanavade'; and 'Description' with the value 'First level'. At the bottom right of the modal are 'Cancel' and 'Save' buttons.

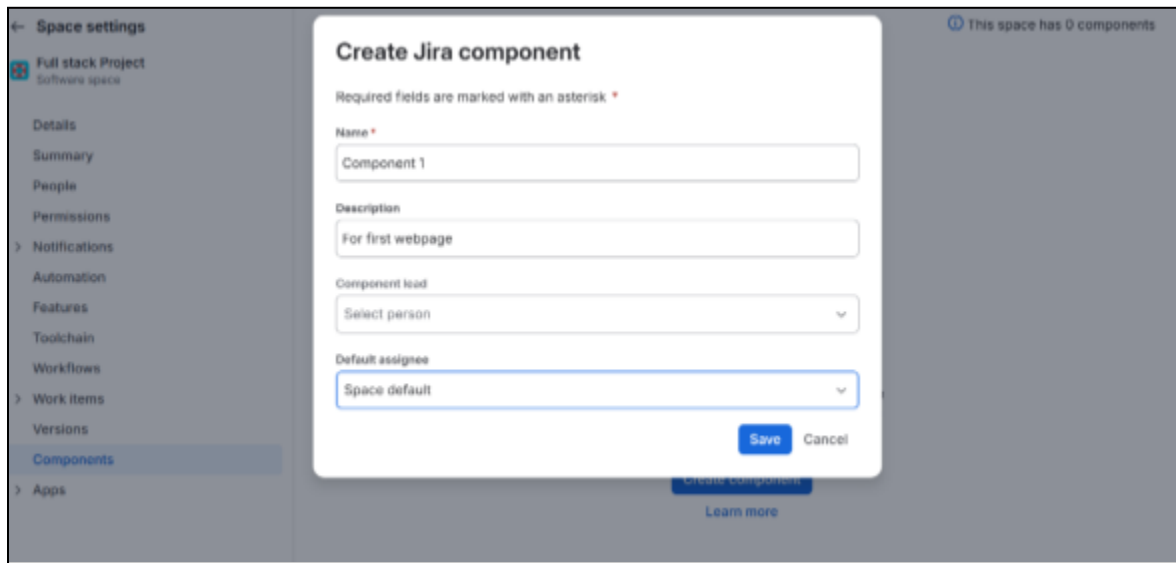

Version list will Appear

Click on components. Create Components.

The screenshot shows the 'Space settings' page in Jira. On the left is a sidebar with a list of settings: Details, Summary, People, Permissions, Notifications, Automation, Features, Toolchain, Workflows, Work items, Versions, Components (highlighted), and Apps. The main content area has a header that says 'This space has 0 components'. Below this is a message: 'Group and assign work around features, departments, or workstreams specific to your space. [Learn more about Jira components](#)'. There is a graphic of three interlocking blocks (two blue, one dark blue). Below the graphic, it says 'This space doesn't have any components, yet'. A sub-message follows: 'Components are subsections of a space. Use them to group work items within a space into smaller parts.' At the bottom of the main content area is a blue button labeled 'Create component' and a link labeled 'Learn more'.

Enter details and save.

The screenshot shows the 'Create Jira component' dialog box in Jira. The dialog is titled 'Create Jira component' and has a subtitle 'Required fields are marked with an asterisk *'. It contains four input fields: 'Name *' with the value 'Component 1', 'Description' with the value 'For first webpage', 'Component lead' with a dropdown menu showing 'Select person', and 'Default assignee' with a dropdown menu showing 'Space default'. At the bottom right of the dialog are 'Save' and 'Cancel' buttons. The background shows the 'Space settings' page for 'Full stack Project' with a sidebar menu including 'Details', 'Summary', 'People', 'Permissions', 'Notifications', 'Automation', 'Features', 'Toolchain', 'Workflows', 'Work items', 'Versions', 'Components', and 'Apps'. A status bar at the top right of the background page says 'This space has 0 components'.

Component list will appear.
